MESSAGES

Message from National Disaster Risk Reduction and Management Authority (NDRRMA), Nepal

Message from USAID/BHA

USAID's Bureau for Humanitarian Assistance (BHA) commends PEER for its work improving emergency response capacities in Nepal and across Asia. Nepal offers many useful lessons for PEER implementation across the region and this publication will serve as a critical reference for PEER partner institutions in other countries. May the successes, challenges and lessons learned from PEER continue to motivate Nepal and the rest of PEER region strive for a sustainable level of capacity building, strengthened coordination and networking in emergency response. Congratulations to all PEER partners in the region.

USAID | Bureau for Humanitarian Assistance

Message from Chief of Party PEER and President NSET

The Program for Enhancement of Emergency response (PEER) was implemented in the 1980/1990s in Latin Americas and the Caribbeans by USAID/OFDA as an Urban Search and Rescue (USAR) program, and the South Pacific, and it was then brought to Asia in 1998.

The first phase of PEER was implemented from 1998-2003 and introduced in the region by Asian Disaster Preparedness Centre (ADPC) with program implementation in four countries, namely, Indonesia, India,

Nepal, and the Philippines. The focus of the program was acceptance in the region, adaptation of the courses to Asian realities and needs, and development of regional instructors.

Success of the program demanded its continuation as institutionalization of enhanced emergency response capacity for reducing mortality from natural hazard disasters requires a sustained effort. The US Office of Foreign Disaster Assistance (US OFDA), which provided core funding for the PEER program, entrusted National Society for Earthquake Technology-Nepal (NSET) during 2003-2009 in the four countries with Bangladesh as a fifth country. After the devastating Kashmir earthquake of 2005, Pakistan was also drawn in as the sixth country for PEER implementation. The focus of the second phase of PEER program was development of a training system and institutionalization of MFR, CSSR, and TFI curricula in national emergency response training institutions that usually were in the public sector. This entailed development of national instructors by adopting a stepwise process of a) providing end-users training to well-selected responders with proven potentials of developing into instructors, b) training the selected potential candidates to the skills of adult education and training by sitting them on the Training for Instructors course, and c) sitting the successful candidates to instructor development courses such as MFR Instructor's Workshop (MFRIW) and CSSRIW. NSET developed / updated the last two courses with the help of Regional Instructors from the program countries. In this phase, a new curriculum on Hospital preparedness for Emergencies (HOPE) was created and implemented. HOPE also become one of the most attractive courses

for health-sector personnel. This phase of PEER expressed the need to bring the capacity to the community level as well, and hence the course Community Action for Disaster Response (CADRE) was developed, piloted, and included as one of the regular courses under the program. Later, again responding to the felt need for imparting skills in rescuing victims in swift waters, which were many in the mountainous parts of the program countries.

The third stage of PEER program was implemented from 2009-2014 by NSET. The focus of the third phase was on the adaptation of courses at the National level in the region, also to develop highly competent national instructors. During this phase the community level preparedness need was identified and was also implemented.

The fourth phase of PEER was implemented by NSET, till the end of September 2021. ADPC was also awarded a portion of PEER activities for implementation in South and Southeast Asia. In the fourth stage, the major focus was on the development of responders and instructors in Medical First Responder (MFR), Collapsed Structures Search and Rescue (CSSR), Hospital Preparedness for Emergencies (HOPE), Community Action for Disaster Response (CADRE), and Swift Water Rescue (SWR), to develop networking and cooperation among the countries in the region.

Due to the global pandemic of COVID 19, the PEER had to face challenges to implement the program, however it also taught to adapt new innovations in such adverse situation. New ideas were explored by implanting program in new ways such as online refresher courses, and hybrid courses.

In fourth phase of PEER, NSET implemented the core programs initially in four countries namely, Bangladesh, India, Nepal, and Pakistan. ADPC continued implementing PEER in Southeast Asian countries, namely Cambodia, Indonesia, Lao PDR, Philippines, and Thailand. On fourth phase PEER program was also partially implemented in the rest of SAARC countries, namely Afghanistan, Bhutan, Maldives, and Sri Lanka by inviting participants to attend some regional training and strategy exploration workshops. All PEER courses like CADRE, MFR, CSSR, HOPE have undergone real-time tests when the trained responders were tasked with responding to real disaster scenarios; every time they have delivered international level services of search and rescue. Handling of Savar factory collapse in Bangladesh or performance of Indian rescuers in the aftermath of 2011 Tohoku earthquake or a close collaboration and understanding during the critical times of Gorkha earthquake among Bangladeshi, Bhutanese, Indian, and Nepali

emergency rescuers, who were trained in the same standards and culture of PEER, and the ease at which they coordinated with international contingents of rescuers, was noteworthy; this justified our strict adherence to the PEER standards and quality of the training programs.

In earlier phases, PEER courses focused on developing instructors; in the later part of the fourth phase, however, the focus shifted to emphasizing production of end-user responders in all skills, as the program could help develop a significant cadre of professionally trained PEER instructors of emergency response training and PEER courses were successfully institutionalized= PEER in the national training institutes of project countries with due sensitivity to local contexts and needs. Since the PEER courses are interconnected CADRE-trained community responders could provide appropriate initial care, then handover the scene to professional responders upon their arrival at the scene, and hospitals could continue to smoothly receive so that in the event of an emergency, injured victims as they were equipped with properly trained personnel and well-established system of hospital preparedness for emergencies. As a part of the training program CADRE, community volunteers are given access to the basic emergency response equipment and tools they need to effectively respond quickly at the very outset of an emergency. In the Golden Hour of emergency response, the role of community volunteers is critical. In the absence of professional responders or the delayed arrival of advance-level emergency response teams, trained community responders can help save lives. For professional responders, MFR and CSSR training allows national and sub-national response teams to work alongside international emergency response teams during large disasters, saving more lives. Hospitals develop disaster response plans as part of the HOPE course to be better prepared for various emergencies and disasters.

A proficient team of instructors and responders has been developed in all project countries of the region. These responders from different countries have formed and informal regional network among themselves. It is expected that such practice of informal networking will be handy in case of any emergency in the region for collaborating and working together in situation of materials and equipment constraints. Adherence to the PEER course system and standards followed in the different courses also become useful as responders from different countries can work coherently even without knowing one another's language. emergency response courses. A comprehensive database system has also been developed from where respective authorities will be able to collect the data

regarding PEER instructors and developers for developing strategy and developing more instructors and responders and mobilizes them accordingly. Different information on PEER history, achievements and lessons learned have also been documented in PEER book (Volume I) and PEER Album (Volume II).

PEER courses like MFR, CSSR has also been successfully institutionalized and implemented in Nepal. All security forces in Nepal have formed disaster management schools and they have adapted these courses and included in their annual training calendar. They have developed many responders and it has been a continuous process. Similarly, it also has been implemented in all the different PEER countries by different organizations like Fire Service and Civil Defense (FSCD) and Bangladesh Red Crescent Society (BDRCS) in Bangladesh, National Disaster Response Force (NDRF) in India and Rescue 1122 and Pakistan Red Crescent Society (PRCS) in Pakistan.

The real-life stories from PEER countries featured in this book are verification of the program's success, and the lessons learned pave the way for future improvements. May these serve as motivation and inspiration for us to rise to the challenges and continue our efforts to save lives.

I would like to thank everyone who made this program possible through their hard work and dedication. My special thanks to USAID/BHA for supporting in program implementation. I express my gratitude to the nodal organizations, partner agencies, and other stakeholders of PEER implementing countries; respectful appreciation to course developers, instructors, and responders for working together full understanding for the past three decades under the program. Finally, I express my heartfelt thanks to PEER program team, including PEER In-country Consultants (ICCs) in different countries, for their complete buy-in of the program and their full support and dedication during its implementation.

Dr. Amod Mani Dixit

Chief of Party (COP) PEER

President, National Society for Earthquake Technology-Nepal

Message from Executive Director, NSET

The National Society for Earthquake Technology-Nepal (NSET) is proud to be a part of the Program for Emergency Response Enhancement (PEER). NSET implemented PEER since 2003, starting with PEER stage 2 and continued through stage three in partnership with the Asian Disaster Preparedness Center (ADPC), and with sole responsibility in stage four (2014-2021). PEER Stage IV has been completed, however NSET will continue to work in the future to spread success and

best practices and to contribute for preparedness, risk reduction and response (PR3) to disasters.

Participating in the successful execution of the PEER has provided NSET with a wealth of knowledge in terms of concepts, networking, standardization, accreditation, institutionalization, localization, sustainability, and the culture of adaptation, making it a valuable lesson in the implementation of future potential programs. NSET has been a key player in ensuring PEER's suitability and long-term viability in Asia since its inception. PEER provided a platform for continuous learning, including the exchange of experiences and expertise among program countries, which is critical to improving emergency response capacity and networking at the regional, national, and subnational levels. PEER improved networking among PEER graduates and instructors from various backgrounds and fields of expertise, which was crucial in nationalizing and institutionalizing the program for effective response. The contribution of PEER skills and role of PEER graduates/responders in responding to the 2015 Gorkha Earthquake was highly and widely appreciated.

NSET has never failed to innovate in the way it conducts the programs. The main courses of PEER, such as Medical First Response (MFR) and Collapsed Structure Search and Rescue (CSSR), were designed in a basic form to produce a limited number of responders. Swift Water Rescue (SWR) is a new PEER course introduced to the PEER region following the disaster that needs to be institutionalized and accredited. However, due to the pandemic, SWR could not be tested any further. All PEER course series are held in the physical presence of

all course team members, including participants and instructors; however, due to the current COVID-19 pandemic, and in accordance with the country's policies and IPC guidelines, the course delivery methodology has shifted to entirely online and/or blended. NSET PEER offered regional online refresher courses in MFR, HOPE, and CADRE.

The eagerness with which PEER implementing countries and training institutions have embraced the program is vital for strengthening national emergency response efforts. The commitment and support of governments and emergency response organizations, as well as sound strategies, are critical to achieving PEER's goal. NSET is eager to work with stakeholders in any way possible to further develop responders in all South Asian countries and further to the local governments and community levels. NSET focuses on strengthening the national and regional networking groups for future coordination and collaboration on ongoing works and trainings such as refresher courses, equipment prepositioning, upscaling and expanding training courses, and developing and adopting new courses. PEER stage IV has been concluded, but the concept of PEER should continue in the future, with NSET leading or facilitating the process, and all other current program partners and agencies attempting to continue and putting forth their best effort.

NSET appreciates all the hard work done by PEER program team, including In-Country Consultant, graduates, instructors, and other individuals who have contributed in different ways for achieving PEER objectives.

Special thanks go to USAID BHA for continuous support for PEER implementation for more than two decades. Similarly, NSET is thankful to the nodal agencies of all PEER implemented Countries, implementing institutions and partner organizations.

Message from Nepali Army, Nepal

प्रधान सेनापति
Chief of the Army Staff

General Prabhu Ram Sharma
Chief of the Army Staff
Nepali Army

MESSAGE

It is a distinct privilege to congratulate the Program for Enhancement of Emergency Response (PEER) for publishing the PEER book to inscribe the contribution and achievements in the domain of disaster management.

PEER has played a significant role in strengthening the Nepali Army's emergency response capacities since 1998. Further, PEER-trained graduates and instructors have contributed significantly to enhancing the efficiency of Nepali Army personnel in disaster response.

I feel glad to mention that Nepali Army also pursues developing the medium to advance search and rescue teams for a speedy and effective response during large-scale disasters in Nepal and other countries. We continue to strive to elevate hospital preparedness for all mass casualty incidents through the establishment of Mass Casualty Treatment Centre (MCTC) and effective Hospital Preparedness for Emergencies (HOPE) program.

I take this opportunity to express sincere appreciation to NSET and USAID/BHA for all the support rendered to the Nepali Army over the years and wish for thriving success in all our future endeavors to save lives and properties together.

General Prabhu Ram Sharma

Message

Diverse topographic and extreme climatic conditions, geological alignment, rugged Himalayas and altitudinal variations with sharp peaks and valleys make Nepal a disaster-prone country. The consequence of disasters, triggered by the potential hazards that Nepal is exposed to, claims thousands of human lives and causes significant damage to properties and people's livelihood every year.

Since a sudden catastrophic natural disaster can cause massive loss of human lives, disrupt peace and seriously undermine economic prowess of the state, it is imperative to genuinely anticipate impending threats of disaster in order to mitigate associated risk factors and build appropriate response capacities. As a primary law enforcement agency entrusted with the responsibility to respond to any disaster, natural or anthropogenic, Nepal Police remains committed to mobilize its resources and engage in saving lives and properties of the people.

Nepal Police remained a partner organization of Program for Enhancement of Earthquake Response (PEER) since 1998. In its attempt to further improve disaster response capacity, Nepal Police served as a focal point for PEER, under the auspices of Ministry of Home Affairs. Throughout this period rescuers from Nepali Army, Nepal Police, Armed Police Force, Nepal and several other institutions have had the opportunity to participate in instructor development and end-user programs designed to build and enhance knowledge and skills of Search and Rescue Teams in Nepal, according to the established principles and standards.

Moreover, the knowledge and skills acquired during the several phases of PEER proved extremely fruitful during the search and rescue operations carried out in the aftermath of devastating earthquake that struck Nepal in 2015, with epicenter at Gorkha.

I am delighted to know that the efforts we have jointly put in and the contributions we have made are being documented and archived for future reference in the form of 'PEER Book'. I am hopeful that the 'PEER Book' shall be able to capture and present the early training and capacity needs among the first responders in Nepal along with the progress that was achieved by the implementation of five phases of PEER. NSET-Nepal deserves credit for the initiative it has taken to compile and publish the 'PEER Book' and I also take this opportunity to thank NSET-Nepal for the cooperation and support rendered to Nepal Police.

24th December, 2021

Message from Armed Police Force, Nepal

Message from Inspector General Armed Police Force, Nepal

It gives me immense pleasure to know that NSET Nepal is publishing a “Program for Enhancement of Emergency Response (PEER) Book” after completion of stage IV program in 2021. I hope this book will accumulate the best practices and achievement during PEER Stage I to Stage IV, to build a resilient and safer community which will be beneficial to all stakeholders & remain as an institutional reference. PEER is not only supporting to produce instructor and end users but also provides contents for Disaster Management Training of APF, Nepal. Medical First responder (MFR) and Collapsed Structure Search and Rescue (CSSR) are crucial skills learnt through PEER and those skills have been tested time and again, especially during Mega Earthquake in 2015.

Armed Police Force, Nepal was established in 2001 with one of the mandates of disaster rescue and management, along with others. APF, Nepal has started with limited resources and capacity for developing and enhancing its personnel as emergency responders and now boasts hundreds of trained and skilled responders. I take this opportunity to express my gratitude to all stakeholders for the cooperation and coordination to strengthen the capacity of APF, Nepal in the areas of disaster management.

PEER has not only achieved to strengthen disaster response capacities in Asia, it also has been contributing to carry out the rescue operations led by different agencies throughout the world. The trainings under PEER are proven to be rigorous, fruitful and practical. In addition, PEER's success in the area of disaster response is exemplary to others as well.

Beyond PEER stage IV, APF, Nepal envisions a better emergency response system, coordination and networking in Nepal and South Asia.

(Shailendra Khanal)
Inspector General
Armed Police Force, Nepal

Message from Nepal Red Cross Society

Name: Umesh Prasad Dhakal

Designation: Executive Director

Organization: Nepal Red Cross Society

MESSAGE

The journey of Nepal Red Cross Society (NRCS) with PEER began in 1998 when Nepal was among the initial beneficiary-countries in the program.

NRCS is an active PEER partner for MFR and CADRE courses. These courses are foundational in making NRCS better equipped in development of responders, mainly community volunteers. CADRE is an essential part of NRCS' training programs to multiply community volunteers nationwide – an investment with higher returns. Trained community volunteers could bridge the gap in the Golden Hour of response prior to the arrival of professional responders.

We are also grateful that NRCS could assist other PEER partner institutions in Nepal and in other PEER countries for developing qualified MFR and CADRE instructors. We express our steadfast commitment for PEER, including assisting other program countries, whenever required.

NRCS extends its gratitude and looks forward to strengthening collaboration with NSET and USAID/BHA.

Message from National Disaster Response Force (NDRF), India

**Shri Atul Karwal, IPS
DG NDRF**

MESSAGE

India is a PEER program country since 1998. Since then, various specialized courses on MFR and CSSR have been organized for the country's paramilitary forces and still continue for the capacity building of National Disaster Response Force (NDRF) India.

PEER has been instrumental in laying strong foundations for a wide range of engagements by India's emergency response teams – from community empowerment, national emergencies to deployment in international humanitarian and disaster response.

I am happy to note that a decision has been taken by PEER program partners to publish the PEER Book documenting the journey so far. May this book serve as a living testimony of all successes by PEER in India and in the region.

NDRF extends its gratitude and best wishes to NSET and USAID/BHA and all PEER partners.

**Atul Karwal, IPS
Director General
National Disaster Response Force, India**

Message from The National Disaster Management Authority (NDMA), Pakistan

MESSAGE

The National Disaster Management Authority (NDMA)-Government of Pakistan extends its gratitude to NSET and USAID/BHA for the indefatigable support through PEER in Pakistan. The country has seen advances in the country's emergency and disaster response after being inducted in PEER since 2007.

Strong and sustained capacity building makes a huge difference in providing quick response at all levels – from community level by volunteers, by professional responders, to making hospitals ready and operational for all emergencies and disasters.

We look back learning from the past and from other countries, to be able to move forward positively in collaboration with all stakeholders, in saving more lives and promote a culture of resilience in Pakistan and South Asia.

Muhammad Idrees Mehsud
Member (DRR)
National Disaster Management Authority
Government of Pakistan
Islamabad
31st December 2021

Message from Rescue 1122, Pakistan

Pakistan is the fifth largest country in the world with a population of 227 million spread over 881913 sq. kms. Pakistan has diverse topography with the world's highest mountain peaks located in Karakoram Range in the north, desert & riverine areas in the middle and Arabian Sea in the South. This topography, location overactive fault line and increasing number of high-rise buildings and traffic has increased the vulnerability of Pakistan to accidents, emergencies and disasters.

Accordingly, Emergency Services Reforms were initiated in 2002 and a model of integrated Emergency Services known as Rescue 1122 was started from the historic city of Lahore which has become a sustainable model for South Asia. Rescue 1122 has provided a sense safety to the citizens by rescuing over ten million victims without discrimination with an average response time of 7 minutes and saved losses worth over Rs 500 billion through its Emergency Ambulance, Fire & Rescue Services, Community Emergency Response Teams, and Safety Program.

A purpose-built Emergency Services Academy has also been established to ensure sustainable human resource development of emergency services and has trained over 20,000 Emergency professionals from all provinces of Pakistan. Rescue 1122 has also provided CADRE training to over 5000 Community Emergency Response Teams (CERTS).

I highly appreciate the role of PEER Program which was instrumental in setting the foundation of Emergency Services Reforms in Pakistan after the devastating Earthquake of October 2005 in Pakistan. PEER helped in capacity building of instructors for continuous training for Medical Response, Search & Rescue and Community Action for Disaster Response. This capacity building helped the Emergency Services Academy to become the First United Nations INSARAG Classified Team in South Asia.

We would be pleased to share our experiences and learning with our neighbouring PEER countries to enhance regional capacity for Emergency Management and Disaster Response so that we could develop Safer Communities in South Asia.

DR. RIZWAN NASSER
DIRECTOR GENERAL

Preface

Program for Enhancement of Emergency Response (PEER) is a regional program initiated in 1998 by the U.S. Agency for International Development (USAID), Office of U.S. Foreign Disaster Assistance (USAID/OFDA) currently USAID Bureau for Humanitarian Assistance (BHA), to strengthen emergency response capacities in Asia.

South Asia is highly prone to natural hazards; the resulting risk of damage and losses are also very high. Cyclones, floods, landslides, earthquakes, fire and droughts are the most common natural hazards. Tsunamis are rare but devastating when they occur (<https://news.un.org/en/story/2018/11/1024902>). At any moment, a major event could cause large-scale loss of life, loss of assets, displacement and disruption of livelihoods.

The risk of casualty and asset losses due to natural hazard events is very high not only due to vulnerable buildings and infrastructures, but also due to poor emergency response capacity and preparedness. In this context PEER has been a significant project in the region for strengthening preparedness, since 1998, four stages of PEER have been successfully implemented by the end of September 2021.

This NSET-PEER Album is a testament to the program's success, as it provides detail information on courses conducted by NSET-PEER. The main purpose of this album is to reflect major activities accomplished under PEER in printable form, which could work as future reference for conducting and planning purposes.

The PEER program is more than just a development project; it is owned by the institutions involved. Trainees and instructors from all over the South Asian region have expressed their gratitude for the skills they have gained from these courses. These training modules

ingrain discipline, teamwork, obedience, and the ability to teach in addition to the response skills. The book contains several stories that reflect the program's impact and its successful implementation. The PEER program is a success story that has aided in the development of the emergency squad. It has laid the foundation for the emergency response process. This process does not end there; with more specialization and improved technology in the future, the potential of taking these courses will grow even more. It has repeatedly molded itself into various forms in response to changing circumstances, and it will continue to do so in the future.

NSET, as the implementer of PEER program in stage II, stage III and stage IV and developer of various byproducts of emergency courses, will look forward for the opportunity to continue working on strengthening emergency response capacities in Asia. NSET also extends its willingness to extend its assistance considering PEER programs if approached.

Purpose of this Album

The main purpose of this album is to reflect major activities accomplished under PEER in printable form, which could work as future reference for conducting and planning purposes.

Scope

This album provides information on PEER courses conducted by NSET-PEER. In this, the information such as course title, date, venue and complete list of participants and instructors are listed.

Acknowledgements

In the south Asian regions, the Program for Emergency Response (PEER) was implemented and expanded with the same goals and objectives: to help response agencies and institutions become better prepared to respond to and mitigate disasters effectively and efficiently. After more than two decades of implementation, PEER has come to a successful conclusion. All the national disaster management organizations/authorities (nodal agencies), stakeholders, and implementing partners have important contribution to this program.

NSET would like to express gratitude to the United States Agency for International Development/Bureau for Humanitarian Assistance (USAID/BHA), for its continuous support in implementation of PEER over the last two decades.

NSET is thankful to the Nodal organizations, implementing institutions/agencies and partner organizations of PEER Implementing Countries Special thanks goes to:

Afghanistan: Afghanistan National Disaster Management Authority (ANDMA)

Bangladesh: Ministry of Disaster Management and Relief (MODMR)-Department of Disaster Management (DDM), Fire Service and Civil Defense (FSCD), Bangladesh Red Crescent Society (BDRCS) and Directorate General for Health Services (DGHS), National Institute of Preventive and Social Medicine (NIPSOM)

Bhutan: Ministry of Home and Cultural Affairs (MOHCA) and Royal Bhutan Police

PEER ACCOMPLISHMENTS

MEDICAL FIRST RESPONDER (MFR)

BACKGROUND

Medical First Responder (MFR) is a 13-day course of the PEER that was developed by the USAID/ BHA (formally OFDA) in collaboration with the Miami-Dade Fire Rescue Department, ADPC, and NSET. The course has been delivered in Bangladesh, India, Indonesia, Nepal, Pakistan, and the Philippines. Also, this course has been introduced to the first responders from Afghanistan, Bhutan, Maldives, Sri Lanka, and Thailand.

PURPOSE

The purpose of this course is to provide individuals with first response tasks; the knowledge and skills necessary

to assess, treat and transport sick or injured patient in an emergency or disaster.

TARGET AUDIENCE

Emergency and disaster first response groups, i.e., Security forces, Fire Departments, Red Cross/Red Crescent Societies, Rescue groups associated with Government Emergency Response System and Search and Rescue (SAR) Volunteers.

MFR Graduates and Instructors

Stage I - IV (1998-2021)

Graduates 1396

Instructors 605

COURSE METHODOLOGY

MFR Course is a pass/fail course. The course led by a course coordinator, seven lead instructors with four assistant instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. Experienced course monitor is assigned for overall supervision of course delivery and to make sure if the course has maintained the PEER Standard.

Interactive lectures and demonstration practice sessions are used to present the course content with exercises and written evaluations used to assess participants learning.

COLLAPSED STRUCTURE SEARCH AND RESCUE (CSSR)

BACKGROUND

Collapsed Structure Search and Rescue (CSSR) is an 8-day course of PEER that was developed by the USAID/ BHA formally OFDA together in collaboration with the Miami-Dade Fire Rescue Department, ADPC, and NSET. The course has been delivered in Bangladesh, India, Indonesia, Nepal, Pakistan, and the Philippines. Also, this course has been introduced to the first responders from Bhutan, Afghanistan, Maldives, Sri Lanka, and Thailand.

PURPOSE

The purpose of this course is to provide individuals with collapsed structure search and rescue tasks; the

knowledge and skills necessary to search for, stabilize and extricate victims trapped in collapsed structures using the safest and most appropriate procedures.

TARGET AUDIENCE

Emergency and disaster first response groups, i.e., Security forces, Fire Departments, Red Cross/Red Crescent Societies, Rescue groups associated with Government Emergency Response System and Search and Rescue (SAR) Volunteers.

CSSR Graduates and Instructors

Stage I - IV (1998-2021)

Graduates 1096

Instructors 516

COURSE METHODOLOGY

CSSR Course is a pass/fail course. The CSSR course is delivered by a course coordinator, seven lead instructors with the help of four assistant instructors. CSSR uses the Interactive Lecture Method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. Experienced course monitor is assigned for overall supervision of course delivery and to make sure if the course has maintained the PEER Standard.

Interactive lectures and demonstration practice sessions are used to present the course content with exercises and written evaluations used to assess participants learning

HOSPITAL PREPAREDNESS FOR EMERGENCIES (HOPE)

BACKGROUND

Hospital Preparedness for Emergencies (HOPE) is a 4-day course of PEER that was developed by the USAID/ BHA formally OFDA together in collaboration with Johns Hopkins University, ADPC, NSET and a team of leading experts from throughout the Asia Pacific region. The course has been tested and delivered in Bangladesh, Cambodia, India, Indonesia, Lao PDR, Nepal, Pakistan, the Philippines, Thailand, and Vietnam.

PURPOSE

The purpose of HOPE Course is to address the structural, non-structural, organizational, and medical

concerns of health facilities to develop and implement well-designed plans that increase their capacity to respond effectively to emergencies.

TARGET AUDIENCE

The first HOPE Course in each PEER country is intended for medical experts with expertise in the field of emergency medicine and disaster preparedness and serving as faculty or lecturers at appropriate institutions where future HOPE courses can be conducted. Accordingly, the first course in each country is intended to train future HOPE instructors. Subsequent HOPE courses are intended for members of hospital disaster management committees, including hospital administrators, hospital engineers, emergency room physicians, nurses, and hospital planning staff.

HOPE Instructors and Graduates

Stage I - IV (1998-2021)

Graduates 2594

Instructors 570

COURSE METHODOLOGY

HOPE is a 32-hour course led by a course coordinator, with a team of five lead instructors with the help of two assistant instructors. On top of eight instructors, an experienced course monitor is assigned for overall supervision of course delivery. Course methodology includes interactive lectures and discussions, case studies and a variety of exercises and simulations.

COMMUNITY ACTION FOR DISASTER RESPONSE (CADRE)

BACKGROUND

Community Action for Disaster Response (CADRE) is a 4-day course of PEER that was developed by the USAID/ BHA formally OFDA together in collaboration with the help of American Red Cross, Red Cross/ Crescent Society and ADPC. Red Cross / Red Crescent National Societies are the foremost implementing partner for CADRE. In India, NSET will be working with SEEDS for CADRE implementation. The course has been delivered in Bangladesh, Cambodia, India, Indonesia, Lao PDR, Nepal, Pakistan, Philippines, and Vietnam. Also, this course has been introduced to the first responders from Afghanistan, Maldives, Sri Lanka, and Thailand.

PURPOSE

The purpose of this course is to develop community level disaster responders. It provides individuals with the knowledge and skills necessary in disaster which aims to bridge the gap before the arrival on-site of professional emergency responders.

TARGET AUDIENCE

Community level volunteers or lay persons who are potentially involve in emergency response activities.

Total CADRE Graduates and Instructors

Stage I - IV (1998-2021)

Instructors 581

Graduates 1589

COURSE METHODOLOGY

CADRE was initially designed for three days, however, considering the need for adequate time for practical exercises, recommendations received from senior instructors during courses in PEER Stage 4 Regional Course Review Workshop (CRW) in July 2015. Hence at present CADRE course is scheduled for four days. The course is led by a Course Coordinator, five lead/full instructors with three assistant instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. On top of nine instructors, an experienced Course Monitor is assigned for overall supervision of course delivery and maintain the course standard. CADRE curriculum draws upon the basic elements form other PEER trainings: MFR and CSSR courses. Interactive lectures and demonstration practice sessions are used to present the course content.

SWIFT WATER RESCUE (SWR)

BACKGROUND

Swift Water Rescue (SWR) is 5-day course of PEER that was developed in Stage 4 of PEER by the USAID/ BHA formally OFDA and Rescue 3 International in collaboration with NSET involving water rescue experts from Bangladesh, Bhutan, India, and Pakistan. The regional pilot course has been delivered in Nepal with the participants from Afghanistan, Bangladesh, Bhutan, India, Nepal, and Pakistan.

PURPOSE

The purpose of this course is to provide individuals with

first response tasks; the knowledge and skills necessary to respond during swift water emergencies. This course trains to assess water current and act accordingly with safely rescuing the drowning victims.

TARGET AUDIENCE

Emergency and disaster first response groups, i.e., Red Cross/Red Crescent Societies, Security forces, and Rescue Groups associated with government emergency response system.

Total SWR Instructors and Graduates

Stage I - IV (1998-2021)

Graduates 18

COURSE METHODOLOGY

PEER SWR Course is a pass/fail course. The course is delivered in 5 days led by a course coordinator and six instructors. using the interactive lecture method, which is objective based, performance oriented, tested, and highly participatory. In field, demonstration and practice method is applied for skill transfer. The experience of the instructors is enriched by the interaction between the participants. Experienced course monitor is assigned for overall supervision of course delivery.

Interactive lectures and demonstration practice sessions are used to present the course content with water exercises and written evaluations used to assess participants learning.

TRAINING FOR INSTRUCTORS (TFI)

BACKGROUND

Training for Instructors (TFI) is 5-day course of PEER that was developed by the USAID/ BHA formally OFDA together in collaboration with the Miami-Dade Fire Rescue Department. NSET used this curriculum and strategy while implementing the PEER Program from PEER Stage 2 (2003-2009) until present for PEER Stage 4 (2014-2021). A separate TFI for HOPE was developed and implemented during 2003-2009. The TFI English curriculum has been translated into Bangla and Nepali under the PEER program. Considering the importance of

the course and with the objectives of its maximum utilization, NSET is promoting this course among DRR professionals and institutions that are interested in developing capacities and organizing non-formal training on DRR for adults.

PURPOSE

To train individuals in accomplishment of the tasks necessary to be an effective instructor of PEER training courses.

TARGET AUDIENCE

Anyone who have passion to be an effective instructor and who is required to train someone else to perform a task.

Total TFI Instructors and Graduates

Stage I - IV (1998-2021)

Graduates 910

COURSE METHODOLOGY

The PEER TFI is a pass/fail course, delivered in five days, led by a course coordinator, five full instructors and three assistant instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. Experienced course monitor is assigned for overall supervision of course delivery and to maintain the course standard.

MEDICAL FIRST RESPONDER INSTRUCTORS' WORKSHOP (MFRIW)

BACKGROUND

Medical First Responder Instructors' Workshop is 5-day course of PEER that was developed by the USAID/ BHA together in collaboration with the Miami-Dade Fire Rescue Department, ADPC and NSET. The course has been delivered in Thailand, Bangladesh, India, Indonesia, Nepal, Pakistan, and the Philippines.

PURPOSE

MFRIW course aims to provide participants with the knowledge and practical skills necessary to become a

competent Medical First Responder (MFR) Course instructor.

TARGET AUDIENCE

The MFRIW course in each PEER country is intended for emergency and disaster first response groups i.e., Fire Departments, Red Cross/Red Crescent Societies, Security forces, and Rescue Groups associated with government emergency response system. Individuals are required to have successfully completed the PEER MFR course and Training for Instructors (TFI) course to attend.

Total MFRIW Graduates

Stage I - IV (1998-2021)

Graduates 605

COURSE METHODOLOGY

MFIRW is a pass/fail course. The course is led by a course coordinator, 5 lead instructors and 3 assistant instructors, using the Interactive Lecture Method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. Experienced course monitor is assigned for overall supervision of course delivery. Lesson content must be presented following the interactive method of instruction, using the lesson plans and all associated materials and equipment, as described in the MFR Course guidelines and within established time limits.

COLLAPSED STRUCTURE SEARCH AND RESCUE INSTRUCTORS' WORKSHOP (CSSRIW)

BACKGROUND

Collapsed Structure Search and Rescue Instructors' Workshop is 7-day course of PEER that was developed by the USAID/ BHA formally OFDA together in collaboration with the Miami-Dade Fire Rescue Department, ADPC and NSET. The course has been delivered in Bangladesh, India, Indonesia, Nepal, Pakistan, and the Philippines.

PURPOSE

CSSRIW aims to provide participants with the knowledge and practical skills necessary to become an

expert Collapsed Structure Search and Rescue (CSSR) Instructor.

TARGET AUDIENCE

The CSSRIW course in each PEER country is intended for emergency and disaster first response groups i.e., Fire Departments, Red Cross/Red Crescent Societies, Security forces, and Rescue Groups associated with government emergency response system. Individuals are required to have successfully completed the PEER CSSR course and Training for Instructors (TFI) course to participate in CSSRIW.

Total CSSRIW Graduates

Stage I - IV (1998-2021)

Graduates 516

COURSE METHODOLOGY

PEER CSSRIW is a pass/fail course. The workshop is delivered in seven days led by a course coordinator, five lead instructors and three assistant instructors using the Interactive Lecture Method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. Experienced course monitor is assigned for overall supervision of course delivery and to maintain the course standards.

Lesson content must be presented following the interactive method of instruction, using the lesson plans and all associated materials and equipment, as described in the CSSR Course guidelines and within established time limits. A practice session is scheduled the day before the classes begin for participants to review the use, maintenance and safety precautions for all equipment discussed in the pre-work.

MASTER INSTRUCTOR WORKSHOP (MIW)

BACKGROUND

Master instructor Workshop is 5-day course of PEER that was developed by the USAID/ BHA formally OFDA together in collaboration with the Safety Solutions Incorporated, and National Society for Earthquake Technology-Nepal (NSET).

PURPOSE

This course is designed to enhance the skills of experienced trainers and improve their skills as

facilitators. The workshop has several purposes: to provide comprehensive instructor training information and skills practice for relatively inexperienced trainers; and to improve the skills of experienced trainers within the context of current PEER training programs. The graduates of MIW are eligible to serve as course coordinator and monitor in PEER courses.

TARGET AUDIENCE

The target learning audience consists of experienced trainers who potentially lead PEER courses as course coordinator and monitor.

MIW Instructors and Graduates

Stage I - IV (1998-2021)

Graduates 200

COURSE METHODOLOGY

The course is delivered in five days by seven instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. Interactive lectures and group work sessions are used to present the course content with team activities used to assess participants learning.

HOPE-TRAINING FOR INSTRUCTORS' (H-TFI)

BACKGROUND

HOPE Training for Instructors (H-TFI) is a 5-day course of the PEER that was designed in 2005 with support from the USAID/ BHA formally OFDA. H-TFI curriculum was based on the PEER basic TFI, integrating presentation of HOPE lessons. H-TFI is the requirement for serving as an infrastructure for HOPE course.

PURPOSE

To train individuals to perform the tasks necessary to be an effective instructors of HOPE courses.

TARGET AUDIENCE

HOPE Course graduates who are required to train other HOPE course potential participants to perform a task. Aim is to develop effective instructor for HOPE course.

HOPE-TFI Graduates

Stage I - IV (1998-2021)

Graduates 570

COURSE METHODOLOGY

H-TFI is a pass/fail course delivered by six full instructors (including Course Coordinator) with three assistant instructors using the interactive lecture method (ILM) of instruction that is objective-based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants. An experienced Course Monitor will be assigned for overall supervision of the course delivery.

COMMUNITY ACTION FOR DISASTER RESPONSE -TRAINING FOR INSTRUCTORS/ INSTRUCTORS' WORKSHOP (CADRE-TFI/IW)

BACKGROUND

Community Action for Disaster Response-Training for Instructors/ Instructors' Workshop (CADRE-TFI/IW) is an 8-day course of the PEER that was developed by the USAID/ BHA formally OFDA together in collaboration with the Miami-Dade Fire Rescue Department, ADPC and NSET with the help of American Red Cross, Red Cross/ Red Crescent National Societies. The course has been delivered in Bangladesh, India, Indonesia, Nepal, Pakistan, and the Philippines.

PURPOSE

To provide future CADRE Course instructors the basic knowledge and skills necessary to present and conduct

the lessons, practical exercises, post-tests, and evaluations of the CADRE Course, while properly applying the interactive method of instruction.

TARGET AUDIENCE

CADRE Course graduates who are required to train other CADRE course potential participants to perform a task. A desire is to develop effective instructor for CADRE course.

CADRE-TFI/IW Graduates

Stage I - IV (1998-2021)

Graduates 581

COURSE METHODOLOGY

CADRE-TFI/IW is a pass/fail course led by a Course Coordinator, five lead/full instructors, and three assistant instructors. The experience of the instructors is enriched by the interaction between the participants. On top of nine instructors, an experienced Course Monitor is assigned for overall supervision of course delivery. This Workshop applies the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory.

Trainees and their supervisors pay their full commitment and plan accordingly. Presentations are made in a suitable classroom set-up. Each group of participants have a facilitator/guide to advise them. Lesson contents are presented according to the Interactive Method of Instruction, using the lesson plans, materials, and equipment available as outlined in the CADRE Course, within the time frames established by the facilitators in the CADRE Instructor's Workshop.

MEDICAL FIRST RESPONDER (MFR) REFRESHER COURSE (ONLINE)

BACKGROUND

Medical First Responder (MFR) Refresher Course (Online) is a 2-day course of the PEER that was developed in Stage 4 of PEER by the USAID/ BHA formally OFDA in collaboration with NSET. Senior MFR instructors from Bangladesh, India, Nepal, and Pakistan were involved as resource personal for developing the course. The course has been delivered in online platform in all countries.

PURPOSE

The purpose of this course is to refresh the knowledge acquired during MFR course as well as update with respect to COVID-19 Pandemic providing the knowledge and skills necessary to assess, treat and transport sick or injured patient in an emergency or disasters including Pandemics.

TARGET AUDIENCE

MFR Graduates from different rescue groups who are associated with emergency response system.

MFR RC (Online + Physical) Graduates

Stage I - IV (1998-2021)

Graduates 133

COURSE METHODOLOGY

PEER MFR Refresher Course is a delivered through online platform maintaining the PEER standards. This course is two days which is led and monitored by an experienced course coordinator/course monitor and three instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants.

Interactive lectures and demonstration practice, online group work is used to present the course content with maximum utilization of internet-based learning system.

COLLAPSED STRUCTURE SEARCH AND RESCUE (CSSR) REFRESHER COURSE

BACKGROUND

CSSR Refresher Course is 7-day online course of the PEER that was developed by the USAID/ BHA in collaboration with NSET. Senior CSSR instructors are involved to conduct this course.

PURPOSE

The purpose of this course is to fortify the knowledge acquired during CSSR course as well as to update the

knowledge and skills necessary to stabilize and extricate victims trapped in collapsed structures using the safest and most appropriate procedures in an emergency or disasters including Pandemics.

TARGET AUDIENCE

CSSR Graduates from different rescue groups who are associated with emergency response system.

CSSR RC Graduates

Stage I - IV (1998-2021)

Graduates 43

COURSE METHODOLOGY

PEER CSSR Refresher Course is delivered through online platform maintaining the PEER standards. This course is led and monitored by an experienced course coordinator/course monitor and instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants.

Interactive lectures and demonstration practice, group work is used to present the course content.

HOSPITAL PREPAREDNESS FOR EMERGENCIES (HOPE) REFRESHER COURSE (ONLINE)

BACKGROUND

Hospital Preparedness for Emergencies (HOPE) Refresher Course (Online) is a 2-day online course that was developed in Stage 4 of PEER by the USAID/ BHA formally OFDA in collaboration with NSET. Senior HOPE instructors from Bangladesh, India, Nepal, and Pakistan were involved as resource personal for developing the course. The course has been delivered using online platform for the HOPE graduates from Bangladesh, India, Nepal, and Pakistan.

PURPOSE

The purpose of HOPE RC (online) is to reinvigorate the knowledge acquired during HOPE course as well as update with respect to COVID-19 Pandemic to develop and implement well-designed plans that increase their capacity to respond effectively to emergencies or disasters including Pandemics.

TARGET AUDIENCE

HOPE Graduates representing from different organizations.

HOPE RC (online) Graduates

Stage I - IV (1998-2021)

Graduates 38

COURSE METHODOLOGY

HOPE Refresher Course is a delivered through online platform maintaining the PEER standards. This course is two days which is led and monitored by an experienced course coordinator/course monitor and three instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants.

Interactive lectures and online group work are used to present the course content with maximum utilization of web-based learning system.

COMMUNITY ACTION FOR DISASTER RESPONSE (CADRE) REFRESHER COURSE (ONLINE)

BACKGROUND

Community Action for Disaster Response (CADRE) Refresher Course (Online) is 2-day online course that was developed in Stage 4 of PEER by the USAID/ BHA formally OFDA in collaboration with NSET. Senior CADRE instructors from Bangladesh, India, Nepal, and Pakistan were involved as resource personal for developing the course. The course has been delivered using online platform for the CADRE graduates from Bangladesh, India, Nepal, and Pakistan.

PURPOSE

The purpose of CADRE RC (online) is to fortify the knowledge acquired during CADRE course as well as update with respect to COVID-19 Pandemic which aims to bridge the gap before the arrival on-site of professional emergency responders.

TARGET AUDIENCE

CADRE Graduates representing from different organizations.

CADRE RC (online) Graduates

Stage I - IV (1998-2021)

Graduates 114

COURSE METHODOLOGY

PEER CADRE Refresher Course is a delivered through online platform maintaining the PEER standards. This course is two days which is led and monitored by an experienced course coordinator/course monitor and three instructors using the interactive lecture method (ILM) of instruction that is objective based, performance oriented, tested, and highly participatory. The experience of the instructors is enriched by the interaction between the participants.

Interactive lectures and online group work are used to present the course content with maximum utilization of web-based learning system.

PEER COURSE EVENTS

Country Planning Meetings (CPM)

BACKGROUND

Country Planning Meetings and Workshops were organized at the start of PEER in each stage and in each PEER affiliated country to discuss country-specific needs, major strategies for developing required instructors and end-users for various emergency response courses and plans, and programs for achieving the strategies. Representatives from NDMOs and collaborating training institutions, as well as a team of instructors from affiliated academia and private sector organizations and foundations, attend the Country Planning Workshops. These discussions help to reach an agreement on the priorities and core contents of the country plan for each PEER Stage.

Strategic Planning Workshop (SPW)

BACKGROUND

Strategic Planning Workshops were held to develop a consensus on issues, gaps, approaches, and methodologies. Moreover, such workshops also help in identifying resources, capabilities, and needs for improving the courses. The major topics for discussion in Strategic Planning Workshops are potentials for regional networking and possible mechanisms; development, maintenance of PEER Database systems; and the possibility of expanding the database to include national capabilities, mode of operation, database hosting, etc. SPWs provided opportunities for all program countries to meet, share and establish mutual learning process. SPW involves the participation of professionals from nodal and partner training institutions and the team of instructors from each program country including the potential new countries.

Training for Instructors (TFI) Course

10-14 July 2011 | Fire Service and Civil Defence Training Complex, Mirpur, Dhaka

Introduction

To train individuals to perform the tasks necessary to be effective instructors of PEER training courses. TFI is a 5-day course of the Program for Enhancement of Emergency Response. It was developed by the United States Agency for International Development through its Office of U.S. Foreign Disaster Assistance in collaboration with the Miami-Dade Fire Rescue Department. Asian Disaster Preparedness Center (ADPC) used this curriculum to conduct TFI as a component of the Program for Enhancement of Emergency Response Stage 1 (PEER1) during 1998 - 2003.
